

New Products for License and Supply

Levodopa - Benserazide & Carbidopa - Levodopa

We are excited to be offering three new product dossiers this month. The products are available for license and supply. As of today, these products have no market restrictions.

Parkinson's is very severe disease for the people affected by it and those that seek to care for them. We are pleased to be offering two combination products in generic form.

Levodopa - Benserazide
Carbidopa - Levodopa.

Enoxaparin

Enoxaparin is the third dossier being offered for in licensing. Being a lower molecular weight heparin derivative Enoxaparin works with the body to reduce the effects of blood clots by stopping it from getting worse so that the body's enzymes break down the proteins that created the clot.

These are three newly developed dossiers and are available with supply.

Register your interest today

To register your interest in these new product dossiers please email ip@icepharmagroup.com or click the button below.

If you wish to receive an outline quotation, please state the product, the market/s you are interested in and your estimated demand in single tablets or packs of 30.
