

## COVID-19 Rapid Test Kit for Detection of IgG and IgM Antibodies

**NOW AVAILABLE FOR SUPPLY**

This Antibody Based Rapid Test Kit sits under the EU Directives for In Vitro Diagnostic Medical Devices Directive 98/79/EC.

It performs qualitatively to detect IgG and IgM antibodies to SARS-CoV-2 in human whole blood, serum or plasma samples. The kit does not contain any invasive components such as needles or lancets to draw the human whole blood, serum or plasma samples which the healthcare professional need to provide to perform the tests.
