

Bleomycin & Buspirone Dossiers

We have two new dossiers available for license and supply;

Bleomycin

Bleomycin anti-biotic was brought to market way back in the 1960's and is still used today as part of chemotherapy regimes including testicular and cervical cancers, melanoma, and sarcoma.

In more recent years with the advent of new drugs Bleomycin has been in lesser demand and as such the availability of supply sources has reduced.

IPG are pleased to announce a fresh dossier is available for license and supply coming as 15 units (15,000 IU) and 30 units (30,000 IU) vials.

Buspirone

Buspirone is used as an anxiety medication action on serotonin receptors and is considered less of a sedative than other anxiety medications.

This fresh dossier of 5mg Buspirone Hydrochloride tablets is available for licensing and supply. Given relative size of markets IPG are seeking partners in world-wide markets.

If you can't find what you're looking for, please **get in touch** so that we can deal with your request. We work with an extensive global network who have MAs they are willing to sell or arrange for a Duplicate. Fill in the enquiry form below with your MA requirements to receive a proposal.

Boutique Powder Filling Facility for Sale

It is not often that an MHRA certified powder filling facility in the UK comes up for sale. The facility was built to fill powders into poly-lined cartons for pharmacy and hospital sales. As part of a strategic review of their business objectives the owners determined the facility and it's products no longer a core activity.

The two products currently manufactured in the facility both have UK Marketing Authorisations.

To register interest and to receive facility and product details please email us at ip@icepharmagroup.com
